

Process: FFF - Fused Filament Fabrication

TPU-95 is a 95 Shore A semi-flexible filament used in the FFF 3D printing process. This material has an impact strength 84% greater than ABS, abrasion resistance 40% higher than ABS and 76% higher than PLA, and 580% Elongation capabilities. Applications for this material could include grips, guides, hinges, sleeves & snap-fit parts.
